Unit Testing
Mobile Web
Optimization
Writing Skills
Benchmarking
JS Build Systems

Employment

Markit   June 2011 - Present

As a Senior Developer I lead a team, build innovative sites, mentor colleagues, coordinate working groups, and teach classes. I've represented Markit at conferences and organized the company's first employee art show. I'm also a core contributor to our open-source library, F2, which is becoming a standard in the financial industry. To encourage reliable code, I pushed for comprehensive testing, rigorous benchmarking, open-sourcing software, and an adherence to industry best practices.

Bank of America   Aug 2008 - June 2011

As a Senior Analyst / UX Developer I created intranet sites for e-discovery, contributed to internal class libraries, and built custom ASP.NET controls. My team collaborated with colleagues around the world to catalog and display petabytes of data.

Merrill Lynch   June 2007 - Aug 2007

As a Technical Analyst I fixed bugs using IBM's Rational Suite and developed business reports using SQL Server Reporting Engine. I also published a white paper comparing various software development life-cycle methodologies.

Education

B.S. in Management Information Systems   June 2003 - Dec 2007
Florida State University in Tallahassee, Florida

International Study-Abroad Program   Sept 2005 - Dec 2005
Florida State University in London, England
